

Aledade Care Solutions

The ACS care team includes a care team of doctors, social workers, pharmacists and nurses.

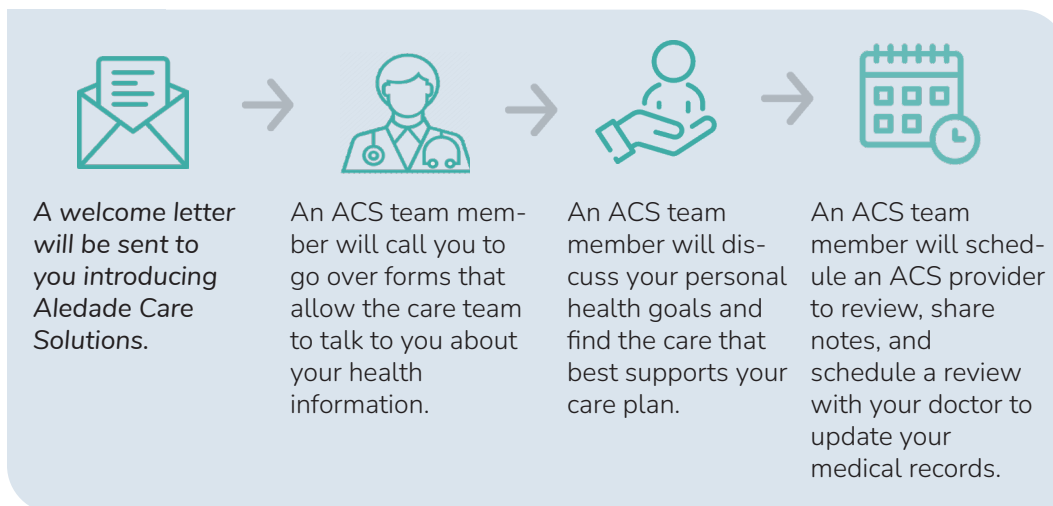

Why Aledade Care Solutions?

Your doctor is working with ACS to offer you services that will improve your health.

- ACS works with you to address prescription drug costs, assess the need for medical equipment, and provide condition-specific counseling to you and your loved ones.
- The ACS care team may include doctors, social workers, pharmacists, and nurses. This care team will work with you by telephone or video to support your plan of care.
- The ACS team is local so that they are familiar with resources in your area.

How It Works

Benefits

- Access to a care team that focuses on your specific needs between office visits.
- Personalized care plan, goals, and visit summaries shared with your doctor.
- Resources to help you spend less time focused on your health and more time enjoying what is most important to you.
- Care provided in the comfort of your home (by video or telephone).

What Else Do I Need to Know?

At this time, there is no action required from you. We will be contacting you shortly to complete the tasks outlined above in the “How it Works” section.

We will work with your health insurance provider for any potential costs outside of standard copay.

We will schedule an ACS provider to review and share notes with your doctor to update your medical record.
